PCN-971601**

128K×8 SRAM Product Change Notification

Change Description: 0.6μ technology to 0.4μ technology, speed enhancement

This letter is to serve as a notification of a product change for Alliance Semiconductor part number AS7C1024. The new 5V and 3.3V 128K×8 product revisions are currently in production and this PCN applies to all speeds and packages. The new revision will meet or exceed the specifications set forth in current Alliance AS7C1024 data sheets and is manufactured using 0.4μ process technology, a step up from 0.6μ technology used to produce the previous revision.

Highlights of the new 128K×8 SRAM revision:

- Enhanced speed distribution to 12 ns for 5V and 15ns for 3.3V
- Mature 8 inch wafer 0.4μ process technology

Alliance has made this revision in order to deliver the most competitive performance and cost effective solution to our customers at the highest levels of quality. Shipments of this revision will commence immediately.

Please contact your local sales representative if you have any questions regarding this information.

Sincerely,

Michael G. Davis
SRAM Product Marketing Manager
