PCN-975001**

128K×8 SRAM Product Change Notification

Change Description: 0.4μ technology to 0.35μ technology, speed enhancement

This letter is to serve as a notification of a product change for Alliance Semiconductor part numbers AS7C1024 and AS7C31024. The new 5V and 3.3V 128K×8 product revisions will be available for samples in January 1998 and production in March 1998. This PCN applies to all speeds and packages. The new revision will meet or exceed the specifications set forth in current Alliance AS7C1024 and AS7C31024 data sheets and is manufactured using 0.35μ process technology.

Highlights of the new 128K×8 SRAM revision:

- Enhanced speed distribution to 10ns for 5V and 12ns for 3.3V
- Leading-edge 8 inch wafer 0.35μ process technology

Supplies of the existing revision will be available for 6 months from the publication of this notice. Customers expecting continued supplies of AS7C1024 or AS7C31024 are encouraged to qualify this new revision at the earliest convenience. The deadline for placing last-time purchase orders is May 1, 1998.

Alliance has made this revision in order to deliver the most competitive performance and cost effective solution to our customers at the highest levels of quality.

Please contact your local sales representative if you have any questions regarding this information.

Sincerely,

Michael G. Davis
